

Electric pressure sensitive tape dispenser **H.690N**

Self-adhesive tapes based on fabric or film with a width of 8-50 mm can be cut with millimeter precision using this device. The tape length is infinitely programmable from 20 - 999 mm.

The device is equipped as standard with a photoelectric sensor, digital display and length storage (buffer), which enable optimal handling.

The finger guard is protected by patent. Additional tape roll supports for roll carriers that deviate from the standard and an electrical pre-pulling for tapes with high adhesive power are available. Due to the compact, stable and handy design with 230 Volt connection, this inexpensive device offers many possible uses in the office, production and shipping.

NEW:

Up to 5 different lengths can be programmed and dispensed consecutively.

CE standard

Technical data:

Tape length	20-999 mm	Power supply	220-240V/41W
Tape width	9-50 mm	Dimensions HxWxL	150 x 135 x 225 mm
Max. roll diameter	180 mm	Weight	2,5 KG
